📍 Sydney, Australia

🌐 <https://github.com/marianlea>

Sydney-based Software Engineer skilled in both front-end and back-end technologies with a consistent focus on achieving functionality and aesthetically pleasing designs that balance form and practicality. Bringing a unique blend of programming skills and culinary background that helps me cook up effective and innovative solutions in the tech world.

PROFESSIONAL EXPERIENCE

Software Engineering Graduate

General Assembly | December 2023 - March 2024

Intensive 12-week (500+ hours) full-stack development program focusing on fundamentals, programming languages, libraries and best practices

Project 3 : PipelineApp

- a single page application (SPA) created in collaboration with a small group using PostgreSQL database, full-stack JavaScript and Google Maps API to show the latest oil prices and nearest petrol stations by detecting the user location

Project 2 : Stitches | [Github](#) | [Live Site](#)

- CRUD app (simple Twitter clone)
- utilised BCrypt for password-hashing and storage
- built web forms to collect data from users
- implemented session cookies for better user experience when navigating through the app as well as security in edit/deleting posts, and used PostgreSQL database
- deployed on Render

Project 1 : Ghiblie Tic-Tac-Toe | [Github](#) | [Live Site](#)

- a responsive client-based game by utilising the DOM API while allowing users to have a more personalised experience by collecting their names and providing avatar choices
- deployed on GitHub Pages

Pastry Chef

Mad House Bakehouse | Catering Project |
Shangri-La at The Fort, Philippines

May 2015 - November 2023

- Actively applied problem-solving skills, attention to detail, creativity and drive for results to consistently produce high-quality products and to optimise procedures to adapt to increasing consumer demands
- Effectively collaborated with team members to streamline production by showcasing strong communication and teamwork skills
